

February 2014 - 2nd edition

Dear reader,

The PERFORMER project partnership is very pleased to bring to your attention the second edition of its quarterly Newsletter!

## Introducing PERFORMER

The PERFORMER project aims to contribute in (i) drastically reducing the gap between expected and actual building energy performance, and (ii) promoting the energy performance guarantee approach.

In this perspective, PERFORMER will deliver a comprehensive energy performance assessment framework, including a set of methodologies along with a suite of adapted and integrated off-the-shelf tools (e.g. energy simulation software) that factor in building intrinsic attributes, as well as indoor and outdoor environment parameters.

PERFORMER will address the needs of stakeholders across the energy value chain (builders, contracting owners, occupants and ESCOs), embedded in a dedicated quality process ensuring the strict adherence to targeted actual energy performance.

## Latest project news (December 2013 - February 2014)

### Overview of the project progress

The first six months of the project have allowed launching technical activities, collecting information on the four pilot sites, and developing a common understanding of the objectives and expected outcomes of the project amongst partners. First work has started to identify and benchmark performance assessment methodologies... [More](#)

### Project report available!

The aim of this report is to study indicators and indexes that best define the energy performance of buildings in United Kingdom and in Italy, giving priority to buildings other than dwellings. The various European Directives on the energy performances of buildings... [More](#)

### Meeting at the Spanish demo site!

PERFORMER partners from Spain & the UK met at Hotel de las Letras in Madrid over the 18th & 19th December 2013 to discuss their roles & gain a common project understanding. There were 2 new faces to introduce at the meeting on Day 1; Julio Campo Macho for... [More](#)

### Upcoming event: Mark your calendar for Sustainable Places 2014!

The RESILIENT and PERFORMER research projects are pleased to announce the 2014 edition of the “Sustainable Places” annual events. Sustainable Places 2014 will take place in Nice (France) from October 1 to 3, 2014. The event will focus on energy efficiency at building, district and city levels. It will cover... [More](#)

### Upcoming event: Call for contributions – Deadline May 16!

This call for contributions invites to present new results and original work on energy efficiency at building, neighbourhood, district, and city levels. Five kinds of contributions are expected: presentation, paper & presentation (Special issue in Energy Journal)... [More](#)

## Latest context evolution

### Insight on Smart Building Energy Monitoring!

Complementary to the issue of Total Lifecycle Energy Environmental Assessment mentioned in the previous newsletter, also the topic of Smart Building Energy Monitoring is of strong interest for PERFORMER. Final energy consumption of building stock is usually presented in statistics by type of buildings as the energy use... [More](#)
